

INSTITUTE OF MICROBIOLOGY

of the Czech Academy of Sciences

Postdoc in Identification of factors contributing to *Bordetella pertussis* adaptation and survival within macrophages

The Institute of Microbiology of the Czech Academy of Sciences, Prague,
Czech Republic

The Laboratory of Post-transcriptional Control of Gene Expression in Prague is looking for a highly motivated postdoctoral fellow. Successful candidate will be engaged in one of the major projects focused on regulatory mechanisms underlying physiology and virulence of *Bordetella pertussis*, a strictly human pathogen causing whooping cough. Research group currently identifies factors required for successful infection, intracellular survival and persistence within the host. We offer work in a friendly international team headed by Branislav Vecerek.

<https://mbucas.cz/en/research/microbiology/laboratory-of-post-transcriptional-control-of-gene-expression/>

Gross salary: **3000 USD / month** (in CZK), 30 days paid holiday per year.

The starting date is negotiable, but this position should start between September 2021 and January 2022 (the employment contract can start only on the 1st day of the month). **The position is offered for 14 months.**

For more information, please contact Branislav Vecerek (vecerek@biomed.cas.cz).

Qualifications and experience – who can apply:

- The candidate must have his/her Ph.D. degree or its equivalent awarded no more than 7 years ago in a relevant field. The said period may be extended for the maternity or paternity leave period, long-term sickness (more than 90 days), care for a family member (more than 90 days), pre-attestation preparation and military training.
- Be a researcher who has worked for at least 2 whole years over the period of the last 3 years in an organisation(s) outside the Czech Republic in the field of research, with working time at least 0.5 FTE, or who was a Ph.D. student abroad. Czech citizens are not excluded.
- Be an author of at least two publications in a journal with Impact Factor published in the last three years in a relevant field(s)
- The candidate must have an excellent writing, verbal and communication skills in English
- Possess expertise and skills relevant for the position

INSTITUTE OF MICROBIOLOGY

of the Czech Academy of Sciences

Your qualification for this position:

- Ph.D. degree or its equivalent in the field of biology (microbiology, immunology, cell biology)
- knowledge and expertise in microbiology and cell biology (methods of molecular microbiology, work with bacterial pathogens and tissue cultures, FACS) and RNA biology (Northern blot, RT-qPCR)
- ability to publish results in highly impacted journals
- experience with global transcriptomic analysis (RNA-seq) is welcome

Conditions – we offer:

- Full time contract for the whole period of fellowship – temporary contract
- Gross salary: 3000 USD/month
- Support by excellent mentors, creative environment, multinational teams, access to exciting experiments and state of the arts infrastructure
- Employee benefits: 30 days paid holiday per year, a financial contribution for the catering
- The position is supported from the European Union Funds - Operational Programme Research, Development and Education, project No. CZ.02.2.69/0.0/0.0/18_053/0017705 International mobility of researchers of the Institute of Microbiology of the CAS, v. v. i. No 2.

Application:

- Send your professional Curriculum Vitae including the list of your publications with impact factors of the journals, a motivation letter, copies of relevant course/degree certificates (PhD diploma) and contacts to at least two senior researchers, such as your previous supervisors or lead scientists, who can provide a reference, to e-mail: mobility@biomed.cas.cz no later than June 23, 2021. Subject of the e-mail: **postdoc** Incomplete submissions will not be considered.
- Selected candidate(s) will be invited for an online interview via skype or zoom.

About the employer:

The Institute of Microbiology of the Czech Academy of Sciences <http://mbucas.cz/en/> represents the leading and largest institution (over 500 employees) of basic research in microbiology in Central and Eastern Europe, with a track record of scientific excellence in research on microbial ecology, microbial secondary metabolism, microbial cell biology, photosynthetic microorganisms, immunology and molecular and cellular biology of microbe interactions with environment.
