

SCIENTIST – VĚDECKÝ PRACOVNÍK

125 – Laboratory of Molecular Biology of Bacterial Pathogens

Job description:

Independent and motivated scientist, conducting research in the field of molecular biology of bacterial pathogens, with keen interest and expertise in the mechanisms of action of bacterial virulence factors, host-pathogen interactions and infection biology research in animal models. The candidate is expected to propose, develop and implement research projects, apply for research funding, draft and publish scientific papers and direct students.

Requirements:

- PhD. in molecular biology or microbiology
 - Track record of research achievements and scientific publications
 - Track record of grant application submission and publication writing
 - Expertise in microbiology, molecular biology, bacterial genetics and animal models
 - English language: written and spoken communication skills
 - Independent, rigorous, self-organized, motivated, pro-active, positive
 - High level of interpersonal communication skills, collaborative team player spirit
-

We offer:

- Permanent employment
 - Engaging and meaningful creative scientific work
 - 6 weeks of vacation
 - Flexible start to the workday
 - Social fund contributions (meal allowance, Flexi Pass, MultiSport, contributions to pension insurance, vaccinations, children's recreational activities, etc.)
 - Support for further education (language and professional courses)
-

Additional information:

Starting date:

1. 1. 2025

How to apply:

The application should include a CV, a list of publications, and a cover letter.
